

SANDEX

SANEX, practical and transportable sanitiser

#comacsanitizer

The professional range for sanitizing surfaces and floors quickly and effectively.

SANEX is a compact sanitizer, extremely handy and compact. Ideal for sanitizing and deodorizing rooms and offices in any sector, it can also be used for car interiors and air conditioning ducts. SANEX is a light and easily transportable equipment. It is very simple to use, just turn on the machine using the appropriate main switch and, by using the dedicated gun, the spray of the solution is simply and effectively directed.

It is a machine that adapts to different needs, in fact, it can be used

with sanitizing, disinfectant or deodorant solutions. Detergents are nebulized to last longer and are evenly distributed in the air of the environment to be treated. In this way all the surfaces that are present in that environment can be reached and sanitised.

The nebulization process in SANEX takes place by colliding the liquid with a high-speed jet of air and a further passage through an orifice that guarantees an accurate decomposition, producing particles of about 8 microns in diameter.

The decomposition of the chemical product into such small dimensions allows the evaporation of the dispensed product, which therefore passes from the liquid to the aeriform state.

In one minute about 30 gr of specific sanitizing product are dispensed.

The details that make the difference

Machine internal components are easily accessible for filling the solution and for simple maintenance. The machine is equipped with an autonomous air compressor

The power cable of the electric version is 10 m long to freely move.

The exclusive dispensing nozzle is the point where the solution mixes together with the air. This is a key point of the machine, thanks to the choice of a large and easy-to-press lever, SANEX can be used for long shifts without fatigue

Transport

Sanex B can be in any location

The battery version of Sanex allows you to move freely and therefore sanitize everywhere, even in places where you do not have a power outlet. Sanex B is compact and easy to transport so that it can also be used in larger environments such as lobbies, conference rooms or offices, bars, restaurants, shops, schools, gyms and any establishment where it is necessary to sanitize effectively.

Hour meter to constantly check the working hours

Autonomy up to hours

Height-adjustable front handle for easy transport of Sanex B and

The battery version is equipped with standard AGM batteries. This type of battery can be recharged anywhere

On-board battery charger to easily recharge it where there is a suitable power socket

Sanex: the solution for simple but effective sanitization

SOME APPLICATIONS

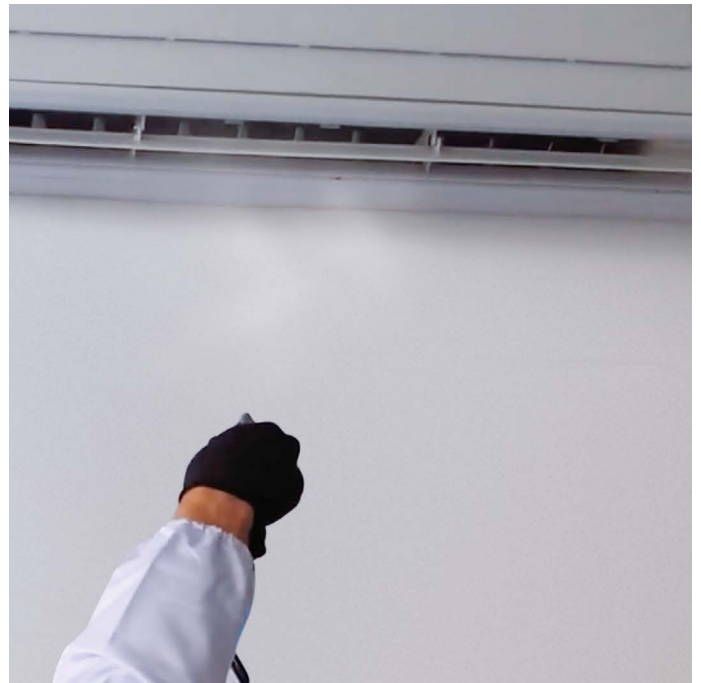

Disinfection
Hospitals ambients

Sanitization
High traffic areas

Deodorisation
Car interiors

Sanitization
Air conditioners and air conditioning ducts
