Description

Bagastro is the name of Sier Disposables elegant product line, made from 70% sugar cane and 30% wood pulp. Sugar cane pulp is also known as «bagasse». As products made from this material are very suitable for gastronomic purpose, we decided to call this series «Bagastro».

Eco Friendly

Bagasse is a waste product in the production of sugar from sugar cane. This waste used to be incinerated, but nowadays it is used, among other purpose, to produce disposables. Moreover, our Bagastro products are biodegradable and thus sustainable as well as eco-friendly.

Unique design

Bagastro products have the rich look and feel of a natural material that lends itself to producing unique shapes. Once again, designer Mieke Cuppen did an extraordinary job creating 23 models, completely in line with modern standards. Our Bagastro series had to be stylish and simple yet practical.
